

Leader Pathway Guides

Positive and effective classroom learning environments require an educator's understanding of the key features of each proficiency level.

The roadmap in the ELPS Instructional Tool guides educators in mapping an English language development success route for ELLs. The Leader Pathway guides administrators along an active path of observing ELPS K-12 within the classroom lessons and student activities.

The Leader Pathway is separated into two groups: K-1 and 2-12. Remember to take notes of things you noticed during the observation in relation to teacher behaviors and student participation to be discussed during the reflection.
